

Over the weekend we have had to review our security procedures for the perimeter fence of the Hollies. This came as a result of an incident on Friday where the rear gate lock was found missing and later retrieved on the school field, we can only conclude from this that it was taken off by a school child who knew the code. The consequences of this caused a serious breach of security to the pre-school children.

We will be installing a bell on the front gate which will sound inside the Hollies and admittance will be given by a member of staff. It is of the utmost importance that the gate code is kept confidential if you do by chance realise the code under no circumstances pass this on to your child. The safety of all children at the Hollies is paramount and we thank you in advance for your co-operation in this matter.
